

All Purpose Sprayer APS

McGregor APS

The McGregor Turf All Purpose Sprayer, or **APS** has been designed and built to provide many years of trouble-free spraying with a minimum amount of maintenance.

The **APS** was designed to slip in the back of almost any brand of service unit and most other workhorse vehicles around your turf operation.

The **APS** can be used to apply insecticides, herbicides, fungicides and many types of plant food.

The **APS** makes your vehicle more versatile; just slip the sprayer out and use your vehicle for other jobs. You do not need to tie up an expensive power unit for just one purpose.
