

ATV – 55 / 30 Spray Master and Wing-Back Pull Sprayer

Using a **McGregor ATV Wing-Back Pull Sprayer** and your 4-wheel ATV, you can spray cropland early before you can get a full size field sprayer on wet ground. This rugged little sprayer gives you a head start early in the spring when the ground conditions will not support a full size tractor and field sprayer.

It can also be used to spray smaller problem areas, conservation strips, airports, parks, and chemical safety zones around farmhouses and buildings.

By dropping the wings, the sprayer can be used in tighter spaces to spray lawns, parks, ditches, fences rows, trees, shrubs, and grain bins.

The **McGregor ATV Wing-Back Pull Sprayer** can be used to apply herbicides, insecticides, fungicides, and liquid plant food. It can be hauled or pulled behind any sized pick-up. The **McGregor ATV Wing-Back Pull Sprayer** offers quick, easy set up for field spraying.

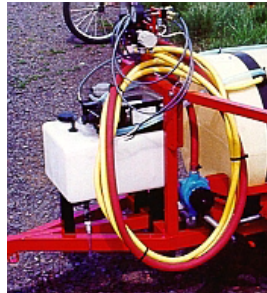

“Standard Features”
