

Road-Side Sprayer

The McGregor Road-Side Sprayer combined with the McGregor Skid Sprayer is a great combination for roadside maintenance.

The Road-Side Spray Boom is equipped with three tip styles for wide angle spraying. The pivot allows the operator to adjust the spray direction for ditches and steep hills.

The spray boom can be mounted in front or behind any pick-up truck with a 2" receiver hitch.

The McGregor Skid Sprayer and the Road-Side Spray Boom have been designed and built to provide many years of trouble-free spraying with minimum amount of maintenance.
