

Tank Trailer Cart

The **McGregor Tank Trailer** is a must for on farm and retail chemical portable tanks. This trailer is built McGregor tough with 3" x 4" rectangular tubing in 3/16" and 1/4" wall sizes. This rugged, heavy-duty trailer is capable of transporting tank sizes up to 10,000-gallons.

The **McGregor Tank Trailer** is equipped with hydraulic "lift and lower" for easy unloading and loading of tanks to and from the field. You can hook the hydraulics to your own vehicle if equipped, or use the optional power pack that easily mounts to the front of the trailer. This hydraulic power pack is driven by a 8-HP Honda engine and provides plenty of power to raise and lower the tank.

Other features for the **McGregor Tank Trailer** are the two nylon tie-down straps to safely secure your tanks to the trailer. When the trailer is not hooked to your vehicle, you can park it and easily detach it with the handy jack. It is also equipped with road lights and a permanently attached oversize load sign.

Permanently attached Oversize Load sign.

Nylon Tie Down straps secures tank to the trailer. Winch mounts are permanently welded to the trailer as well.

Optional hydraulic power pack: 5.5 HP Honda engine delivers plenty of hydraulic power to lift and lower your tank.
